“We currently export frames, cases & instruments to over 40 countries worldwide”

Welcome to hi wear, a range suitable for children and teenagers. Lots of adults who require a small eye fitting also love them as well ! hi 1-22 are manufactured in TR90 a lightweight and rubber touch material. This range is unique as most models (hi 1-17) come with 180° frame temples that can be adjusted (with care) a must for kids frames. They are easy to glaze (always cold glaze*) and sizes start from a 38 eye. The flexibility of TR90 makes it harder to break if dropped.

*If unsure of how to glaze please contact us.

- Superlight TR90 material
- 180°Flexi sides that stretch
- Temples that can be adjusted/shortened
- Temple Tip Holes on all models hi 1-21 for silicon safety band fitting
- A range of cool colours to choose from

TR90 is a thermoplastic material that was produced using innovative Swiss Technology. It's incredibly durable, flexible and lightweight which makes it an ideal material for children's frames. It is extremely resilient to damage.

- Unique flexi temples that can be adjusted/shortened
- Easy to glaze
- Pliable material make hi frames less likely to break or distort if dropped
- Suitable for children with visual difficulties
- Small eye sizes

ORDERING

- Fillout the order form on the back page making sure you state which frame model and quantities you require then email sales@louisstone.co.uk
- We will then email you back a proforma invoice for payment by credit card or bank transfer

EXPORT ORDERS

- Make a minimum order of 50 frames + and a pro forma invoice will be sent to you by return.
- Please provide full invoice/delivery address (any zip/postcode) a contact name and telephone/email details.
- All export orders are sent via courier.
- Vat is not charged on orders, but you are responsible for any local charges/fees made in country of delivery.

INTELLECTUAL PROPERTY & PRICING

- All pictures/images/logo/text and graphic design in this catalogue and on our website are the property of Louis Stone Optical Ltd. Any reproduction of this content must be approved by Louis Stone Optical Ltd.
- All pictures/images in catalogue are for illustration purposes only.
- Prices and discounts are correct at time of going to print however these can change in the future, so always refer to our website for current prices and offers.
- This catalogue supersedes all previous catalogues.
- Standard Trading & Payment Terms Apply.

REDUCE PATIENT FRAME RETURNS BY ADVISING PATIENT ON RECEIPT OF THEIR FRAMES

- Put on and take off your new spectacles with both hands.
- When not in use always keep your spectacles in a secure case.
- Do not put your spectacles on a surface lens downwards.
- Clean lens only with a quality micro fibre lens cloth, but not with hard pressure. Less pressure = cleaner lens, hard pressure can damage lens.
- Do not adjust or attempt any repairs on your spectacles, instead come to your optician's practice immediately for assistance.

FOLLOW THESE GLAZING/ADJUSTMENT INSTRUCTIONS

Always assess material of frame before attempting glazing and adjustments. Certain frames will require a certain heat setting.

PLASTIC FRAMES

- 1 To ensure a good lens shape, check shape of the demo lens, and if a good fit remove from frame and scan as if glazing a supra or rimless frame. We always suggest using this process if using a **tracer method** for ordering lens. **When removing demo lens use heat for 10-15 seconds, but do not leave heater unattended. This will prevent chipping or buckling of frame.**
- 2 Glaze as normal providing demo is a good size, if not size up accordingly. Oversizing of a lens leads to cracking of frame bridge when lens is forced into lens groove.
- 3 Hand edge front and back lens surface (failing to do this will scratch the paint off the front of the frame). **Make sure lens size is appropriate for frame. Forcing a lens into eye rim without properly sizing (including edging/polishing where necessary) will cause frame to break.** Incorrect sizing will not be considered as a frame material/manufacturing fault.
- 4 Always use correct heat level (or no heat) by assessing frame material before glazing. Excessive heat will blister frame, insufficient heat could snap frame front.
- 5 Clean as normal but take care with what lens cleaner you use as this can sometimes mark plastic frames. Always refer to manufacturer's lens cleaner information.

6 For temple adjustment:

- Warm target area but with minimal heat
 - Put pressure on this area and then cool with either cool air or cold water
 - Be aware that more care must be taken with frames with diamante stones
- 7 If adjusting pantoscopic / retroscopic tilt / angle remove temple from frame. With flat fitting to adjust metal joint, use a City Rule (LS177) or a Abdo Rule (LS178) to measure tilt / angle), then place temple back onto frame.

METAL FRAMES

- 1 Always use adjusting pliers with plastic jaws (to prevent scratching on temples). Pliers should be positioned where corner of frame front and lug meet.
- 2 Flexi (Spring) temple joint adjustments must be done with extreme care.
- 3 Use mild heat when adjusting temple tips, but always assess tip material prior to using heat.
- 4 When removing/replacing rim screws, always use a good quality screw driver.

TERMS & CONDITIONS

- Standard trading terms and payment terms apply and are available on request.
- Unless agreed all invoices are monthly nett and E&OE.
- An order made by phone, email or fax will constitute as a contract to purchase items from Louis Stone Optical Ltd.
- Payment can be made by cheque, bank transfer or credit card.
- Frames cannot be sent on sale or return/approval.
- Any promotions cannot be used in conjunction with any other offers or special current frame quantity purchase agreements.
- All frame orders made as a result of our Black Friday Sale cannot be returned.
